FRONT-END DEVELOPER SUMMARY

- Frontend Developer with 3 years of experience in creating responsive web applications using React and Next.js.
- Proficient in HTML5, CSS3, JavaScript, and jQuery to build dynamic and interactive user interfaces.
- Strong experience in developing web applications with React, Next.js, and Redux to create scalable and maintainable code.
- Familiarity with RESTful APIs, AJAX, JSON, and other data interchange formats and Knowledge of cross-browser compatibility, web standards, and accessibility guidelines.
- Ability to work collaboratively with cross-functional teams, including designers, product managers, and backend developers.

WORK EXPERIENCE

MEVETO   FRONTEND DEVELOPER
September 2020 - Present

As a front-end developer, I made significant contributions to the development of Meveto's Lead Tracking Portal, Admin Panel, Meveto documentation, and user dashboard. I utilized my expertise in React, Redux, tailwind CSS, and MUI to build and refactor features, including the subscription module and documentation portal. In addition, I played an active role in code reviews and training of new team members. My contributions also included transitioning the codebase from vanilla Redux to Redux Toolkit and RTK Query, as well as migrating from bootstrap to tailwind CSS at the frontend. My experience highlights my proficiency in frontend development, project management, and training skills.

DEPART   FOUNDER
September 2020 - August 2021

I built Depart, a bespoke web, and mobile app which was part of my final year project for my Bachelor's degree. It automates most of the work related to student and faculty transport. This project Leveraging my expertise in front-end development, I created an intuitive and user-friendly interface for both travelers and university administration. I implemented key features such as real-time notifications, scheduling routes and departure/arrival times, managing vehicle information, and printing travel pass to ensure a seamless transportation experience for all users. Through my work on this project, I gained valuable experience in collaborating with stakeholders and developing solutions that met their needs.

EDUCATION

NATIONAL UNIVERSITY OF MODERN LANGUAGES (NUML)   SOFTWARE ENGINEERING

I have completed 16 years of formal education. My major was Computer Science and Software Engineering.

SKILLS

HTML5
CSS3
JavaScript
React
Redux
Next.js
Tailwind CSS
Git
GitHub
Webpack
Responsive design
RESTful APIs

INTERESTS

Playing cricket and football with friends is always fun, and I enjoy watching cricket matches whenever possible. My favorite food is finger fish, and I love to travel to natural places when I have the chance. One trip that stands out in my mind was to Murree Hills with some close friends. Hiking through the beautiful forests and taking in the breathtaking mountain views was an unforgettable experience.
